DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first arm and the second arm as claimed in claim 5 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,498,859. Although the conflicting claims are not identical, they are not patentably distinct from each other because the

Art.Unit: 2643

limitations in claims 1-14 of U.S. patent 6,498,859 cover the limitations in claims 1-34 of the present invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 and 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Olson (U.S. patent 2,983,790).

Regarding claims 1 and 13-14, Olson teaches an amplified sound system wherein a microphone (2) is maintained at a desired acoustic zone of a speaker (10). The system of Olson comprises a speaker cabinet (12) containing the speaker, a microphone (2), and a microphone mount as claimed (11 and see figure 1).

Regarding claim 2, Olson shows the microphone mount that includes an elongated support member as claimed.

5. Claims 1-3, 8, 13-15, 20 and 25-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Hasenmaier (U.S. patent 5,926,554)

Regarding claims 1, 8, 13-15, 20 and 25-26, Hasenmaier teaches an amplified sound system wherein a microphone (3) is maintained at a desired acoustic zone of a speaker (see

Art. Unit: 2643

figure 1). The sound system of Hasenmaier comprises a speaker cabinet (1) containing the speaker, a microphone (3), and a microphone mount as claimed.

As shown in the drawings, the microphone mount of Hasenmaier has an attachment member that secures the mount to the box or the cabinet.

Regarding claim 2, Haenmaier shows the microphone mount that includes an elongated support member as claimed.

Regarding claim 3, Hasenmaier teaches the microphone mount that is constructed and arranged to provide an adjustable mount for carrying the microphone.

Allowable Subject Matter

6. Claims 4-7, 9-12, 16-19, 21-24, 27-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and overcome the double patenting rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ziegler (U.S. patent 4,977,600) teaches the microphones (10, 12) which are adjustably mounted in front of the speaker s (14, 16).
